

NBCC is pleased to announce that its affiliate CCE has partnered with Pearson VUE to provide testing facilities for counseling licensure and certification. Pearson VUE has the largest testing network in the world, with approximately 900 dedicated locations in the United States.

Benefits for state counselor licensure candidates include:

Faster, easier registration process—Registration processing and test scheduling now takes weeks instead of months. Candidates have a larger network of test sites to choose from and more exam times and seats available to them.

Enhanced site quality control—Candidates for state licensure test at Pearson VUE's dedicated sites, which are used for testing only.

Quicker score reporting—Scores are now available to state licensure boards much faster.

Additional Information

Testing With AMP: Candidates who have begun the registration process with AMP are required to test through AMP.

Reduced NCMHCE Time Limit: Candidates now have three hours instead of four hours to complete the examination (plus 15 minutes to complete the tutorial). Data from the last five years shows candidates complete the examination in less than three hours. Therefore, to keep exam costs to a minimum, we have reduced the allotted time for the exam.
