The National Counselor Examination (NCE)

Exam Purpose

The National Counselor Examination (NCE) measures an examinee's knowledge and understanding of theoretical and skill-based tenets necessary to practice safely and competently as an entry-level counselor. The exam's development is based upon a national job analysis of more than 16,000 credentialed counselors identifying empirically validated work behaviors determined to be most relevant for competent counseling practice.

Measurement Focus and Target Population

The examination is aligned with the eight Council for Accreditation of Counseling and Related Educational Programs (CACREP) content areas. Thus, the content validity of the NCE is anchored on the six empirically validated work behaviors determined to be most relevant for competent counseling practice and the eight CACREP curriculum educational standards. The examinee target population is entry-level counselors with appropriate counseling training as determined by the minimally qualified candidate requirements.

Minimally Qualified Candidate

The minimally qualified candidate (MQC) for the NCE has graduated from or is a well-advanced graduate student in a counseling program* that has been accredited by the CACREP or housed within a regionally accredited institution.

The counseling program must contain courses in the following content areas:

- Professional Counseling Orientation and Ethical Practice
- Social and Cultural Diversity
- Human Growth and Development
- Career Development

- Counseling and Helping Relationships
- Group Counseling and Group Work
- Assessment and Testing
- Research and Program Evaluation
- Counseling Field Experience

*States may choose to allow candidates of comparable education levels from other related helping degrees to sit for the exam for licensure.

Exam Form

The NCE test comprises 200 multiple choice questions (MCQs), of which 160 are scored and 40 are unscored. These 40 MCQs provide statistical information for the items to be used in future examinations. Both scored and unscored items are of the same structure, and they appear in jumbled order in the examination. You will have 3 hours and 45 minutes to complete the test.

Job Analysis and Content Outline

The exam's development is based upon a national job analysis of more than 16,000 credentialed counselors identifying empirically validated work behaviors determined to be most relevant for competent counseling practice. The most recent job analysis was finalized in June 2019, with the content outline drafted and approved by the NCE Exam Committee, which is comprised of Subject Matter Experts (SMEs).

The committee's responsibilities included, but were not limited to, identifying components of the profession and related job tasks and crafting survey items and reviewing the format of the instrument to measure those components and tasks. Development of the job analysis survey was completed at the Center for Credentialing & Education (CCE) over the course of one calendar year (May 2016–July 2017).

The committee also evaluates the examination content for alignment with the eight CACREP content areas following the creation of the content outline to provide valuable information to examinees.

Table 1 presents the six domains and the percent and number of scored items in an NCE examination on each of these domains.

Table 1. *The weight for each domain*

	Domain	Percent of items	Number of scored items
1	Professional Practice and Ethics	12	19
2	Intake, Assessment, and Diagnosis	12	19
3	Areas of Clinical Focus	29	47
4	Treatment Planning	9	14
5	Counseling Skills and Interventions	30	48
6	Core Counseling Attributes	8	13
	<i>Total</i>	<i>100</i>	<i>160</i>

Table 2 presents the knowledge, skills, and tasks under each domain of the Content Outline.
